

JUNE 2026

# INSIGHT JOURNAL

Together, we celebrated achievements, embraced new milestones, and continued growing through teamwork and dedication. Here's a glimpse of the memorable moments and highlights worth celebrating. Every step forward reflected the passion and commitment of our people.

# Editor NOTES

The stories featured in this edition reflect the energy, dedication, and teamwork that continue to shape our organization. Every initiative, achievement, and milestone is the result of individuals coming together with a shared purpose and commitment to excellence.

As we look back on recent accomplishments, we are reminded that progress is built through collaboration, resilience, and a willingness to embrace new opportunities. These moments not only celebrate how far we have come but also inspire us for the journey ahead.

*Harsha Sharma*  
ASSISTANT MANAGER - HR

We hope this edition keeps you informed, engaged, and connected to the people and efforts driving our success.

Thank you for being an important part of our growing story, and we look forward to achieving even more together.

# Growth P A T H

Working with Vaidam Health for almost 5 and a half years has truly been a ride filled with both highs and lows. This journey has taught me patience, empathy, and the importance of understanding every patient's unique situation.

Interacting with patients from different parts of the world has helped me grow both personally and professionally. The happiest moments are when patients recover well and bless us with their kind words and gratitude – those memories stay with me forever.

Over the years, I have gained confidence, learned to handle challenges better, and experienced growth in my career. Being a part of this journey has been rewarding and meaningful.

## HEALTHCARE EXCELLENCE IN THE SPOTLIGHT

Pankaj Chandna's perspective with IndiaMedToday on the evolution of medical tourism, where it's headed, and the role Vaidam Health has played in shaping its growth.

At Vaidam Health, we are proud to be at the forefront of this transformation, making global healthcare more accessible, transparent, and patient-centric. With a strong network of 500+ hospitals and thousands of specialists, we continue to bridge borders and simplify the patient journey with end-to-end support.

What was once considered an alternative option for medical treatment is now a first choice for patients across the world. India's combination of world-class infrastructure, highly skilled professionals, cost-effective treatments, and minimal waiting times is redefining what global healthcare looks like.

Pankaj Chandna, Co-Founder of Vaidam Health, shares exclusive insights into India's rising appeal as a global healthcare hub in this interview. With steady double-digit growth in international patients post-pandemic, Vaidam is capitalizing on demand from Africa and Southeast Asia for specialties like oncology, cardiac surgery and organ transplants. He highlights how AI, virtual consultations and recent expansions are transforming patient journeys toward tech-driven, outcome-focused care.

Vaidam, as tech-enabled healthcare facilitation platforms continue to help international patients navigate hospital choices, treatment options, and travel logistics in a more structured and transparent manner, the role of platforms like ours has never been more critical. The patient profile is also changing. From cardiac surgeries and organ transplants to advanced oncology and robotic orthopaedic procedures, patients are increasingly seeking high-value, outcome-driven care. And India is delivering exactly that, at scale.

# VAIDAM CONNECTS

Rotary District 9213 and Rotary District 9214 have signed a landmark Memorandum of Understanding (MOU) with Vaidam Health aimed at expanding access to specialized medical treatment for Ugandans battling cancer and sickle cell disease.

The partnership is expected to strengthen medical outreach programs and health camps organized by Rotary across different regions of the country, with a major focus on diseases that continue to threaten livelihoods and place immense pressure on families and the healthcare system.

# Learning C U R V E

I have been working at Vaidam Health for the past 8 months as a Country Representative, and my journey so far has been truly wonderful and highly rewarding. From the very beginning, I was welcomed into a professional, well-structured, and supportive work environment where teamwork, learning, and growth are genuinely encouraged. Every day at Vaidam has given me new opportunities to improve my skills, gain knowledge, and grow both professionally and personally.

One of the things I admire most about the organization is how organized and cooperative the entire system is. I have never worked in such a positive and well-managed workplace before. The work culture motivates employees to perform better while also making them feel respected, valued, and supported. This positive environment has made my experience extremely comfortable and enjoyable.

I would especially like to express my sincere appreciation to Pankaj sir, Manish sir, Sonima maam, Papiya, and the entire team for their continuous guidance, cooperation, encouragement, and support throughout my journey. Their helpful nature, positive attitude, and teamwork have played a huge role in making my experience meaningful and rewarding. I have learned so many valuable things from them, and their support has always motivated me to give my best.

Overall, I feel proud and grateful to be a part of Vaidam Health. It has been an amazing journey so far, and I genuinely believe this is one of the best workplaces for learning, growth, and professional development.

# Building I M P A C T

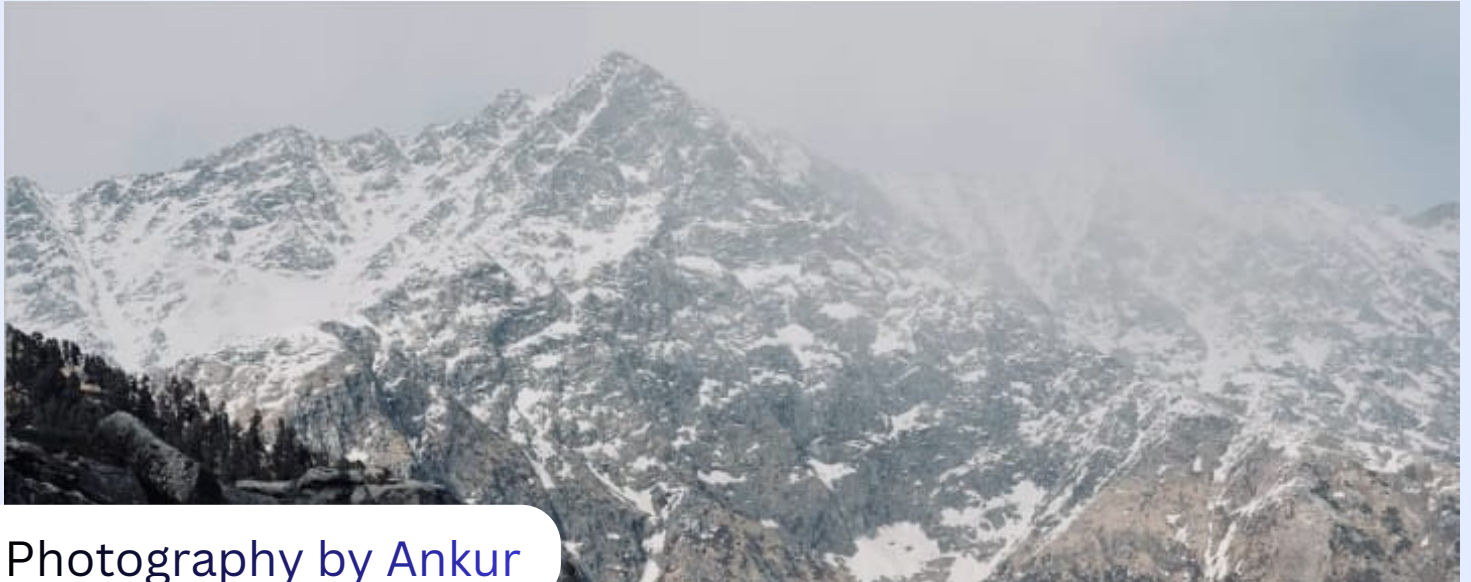

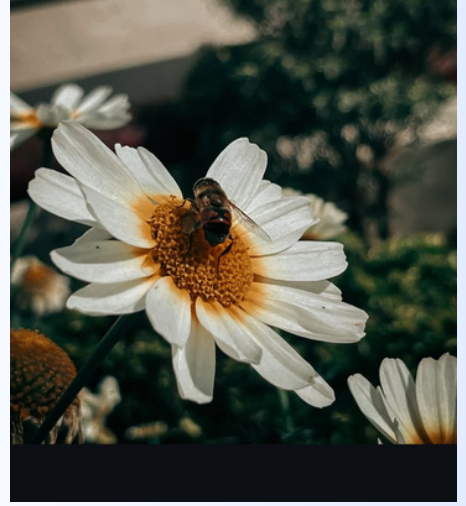

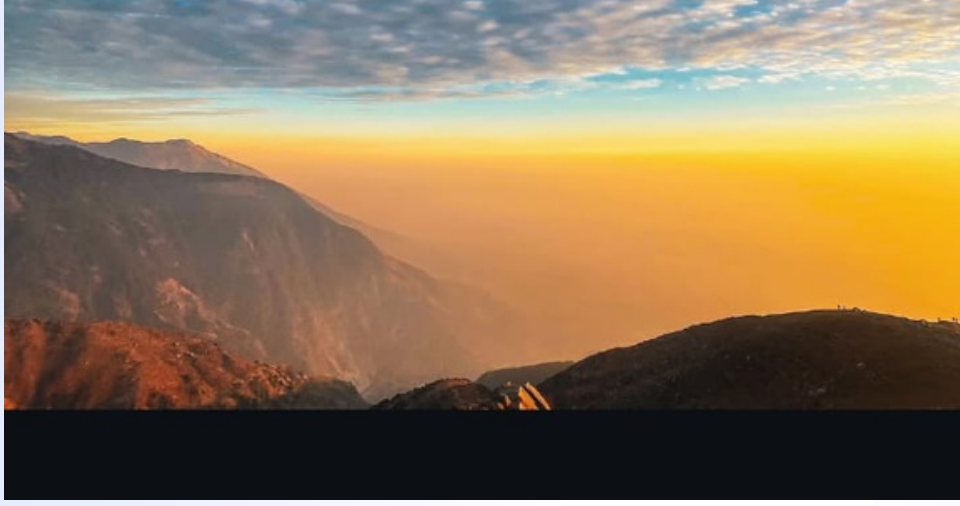

Reflecting on my 5.6 years with the Engineering team, it has been an incredibly rewarding and fulfilling journey. I have had the opportunity to work on a wide variety of exciting projects, continuously learning and growing along the way. Beyond the technical milestones, what truly stands out is the wonderful time I've had working alongside such supportive and talented colleagues. Every challenge we tackled together made the experience even more meaningful. It has been a fantastic chapter of my career, and I am incredibly excited to build upon this foundation.

Looking ahead, our mission to transform patient care inspires me every day to push the boundaries of technology. In healthcare, every line of code we write and every system we build has the power to make a real difference in people's lives. This profound impact makes our work deeply purposeful and drives my commitment to excellence. I am eager to collaborate on next-generation digital solutions that will elevate our platforms and maximize our global reach. By combining our engineering strengths with our core values, I am confident we will set new benchmarks and lead the industry into a healthier tomorrow."

# EMPLOYEE CONTRIBUTION

---

Today, I sat for a while thinking about how some  
people love like thunderstorms.  
Loud, visible, impossible to ignore.

And some love like the yellow light left on in the  
balcony when you are coming home late.  
Soft. Certain. Waiting for you without needing  
applause.

My father has never really said “I love you” in words  
that linger in the air. His love arrives in smaller  
disguises.

Poetry by Priyanka
